CoBéBé

THE SUN

The Sun is a giant star that gives us light and warmth.
It is so big that all the planets could fit inside it.

MERCURY

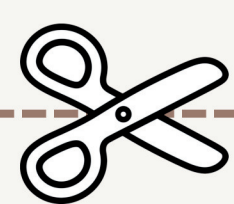

Mercury is the closest planet to the Sun.
It is the smallest planet of all.

VENUS

Venus is the hottest planet.
It shines bright and is easy to spot in the sky.

EARTH

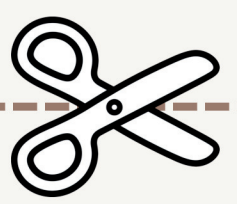

Earth is our home.
It is the only planet we know with water and life.

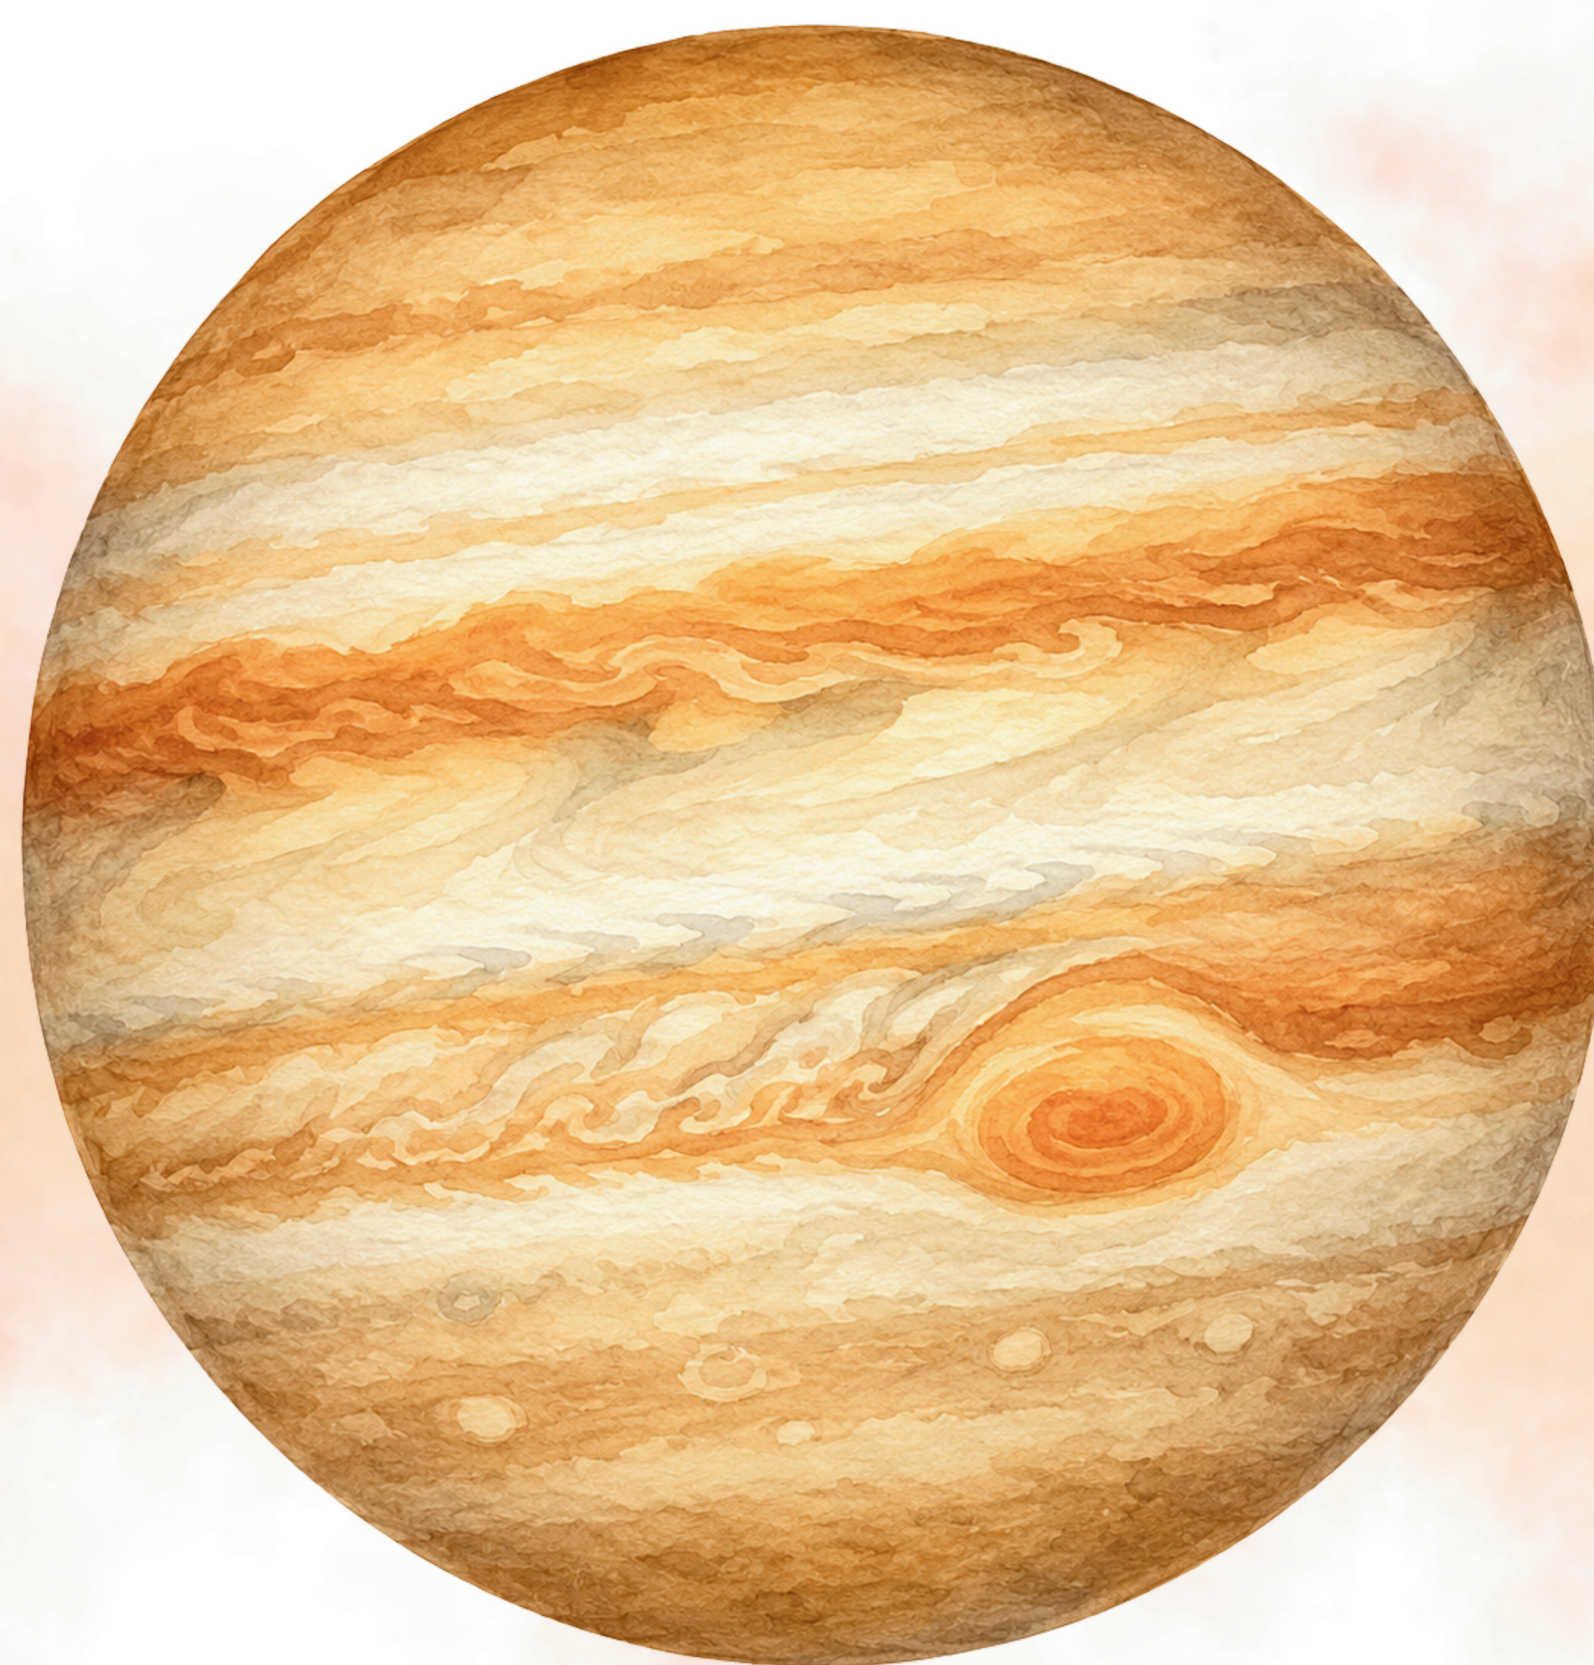

MARS

Mars is called the red planet.
It has the tallest volcano in the whole solar system.

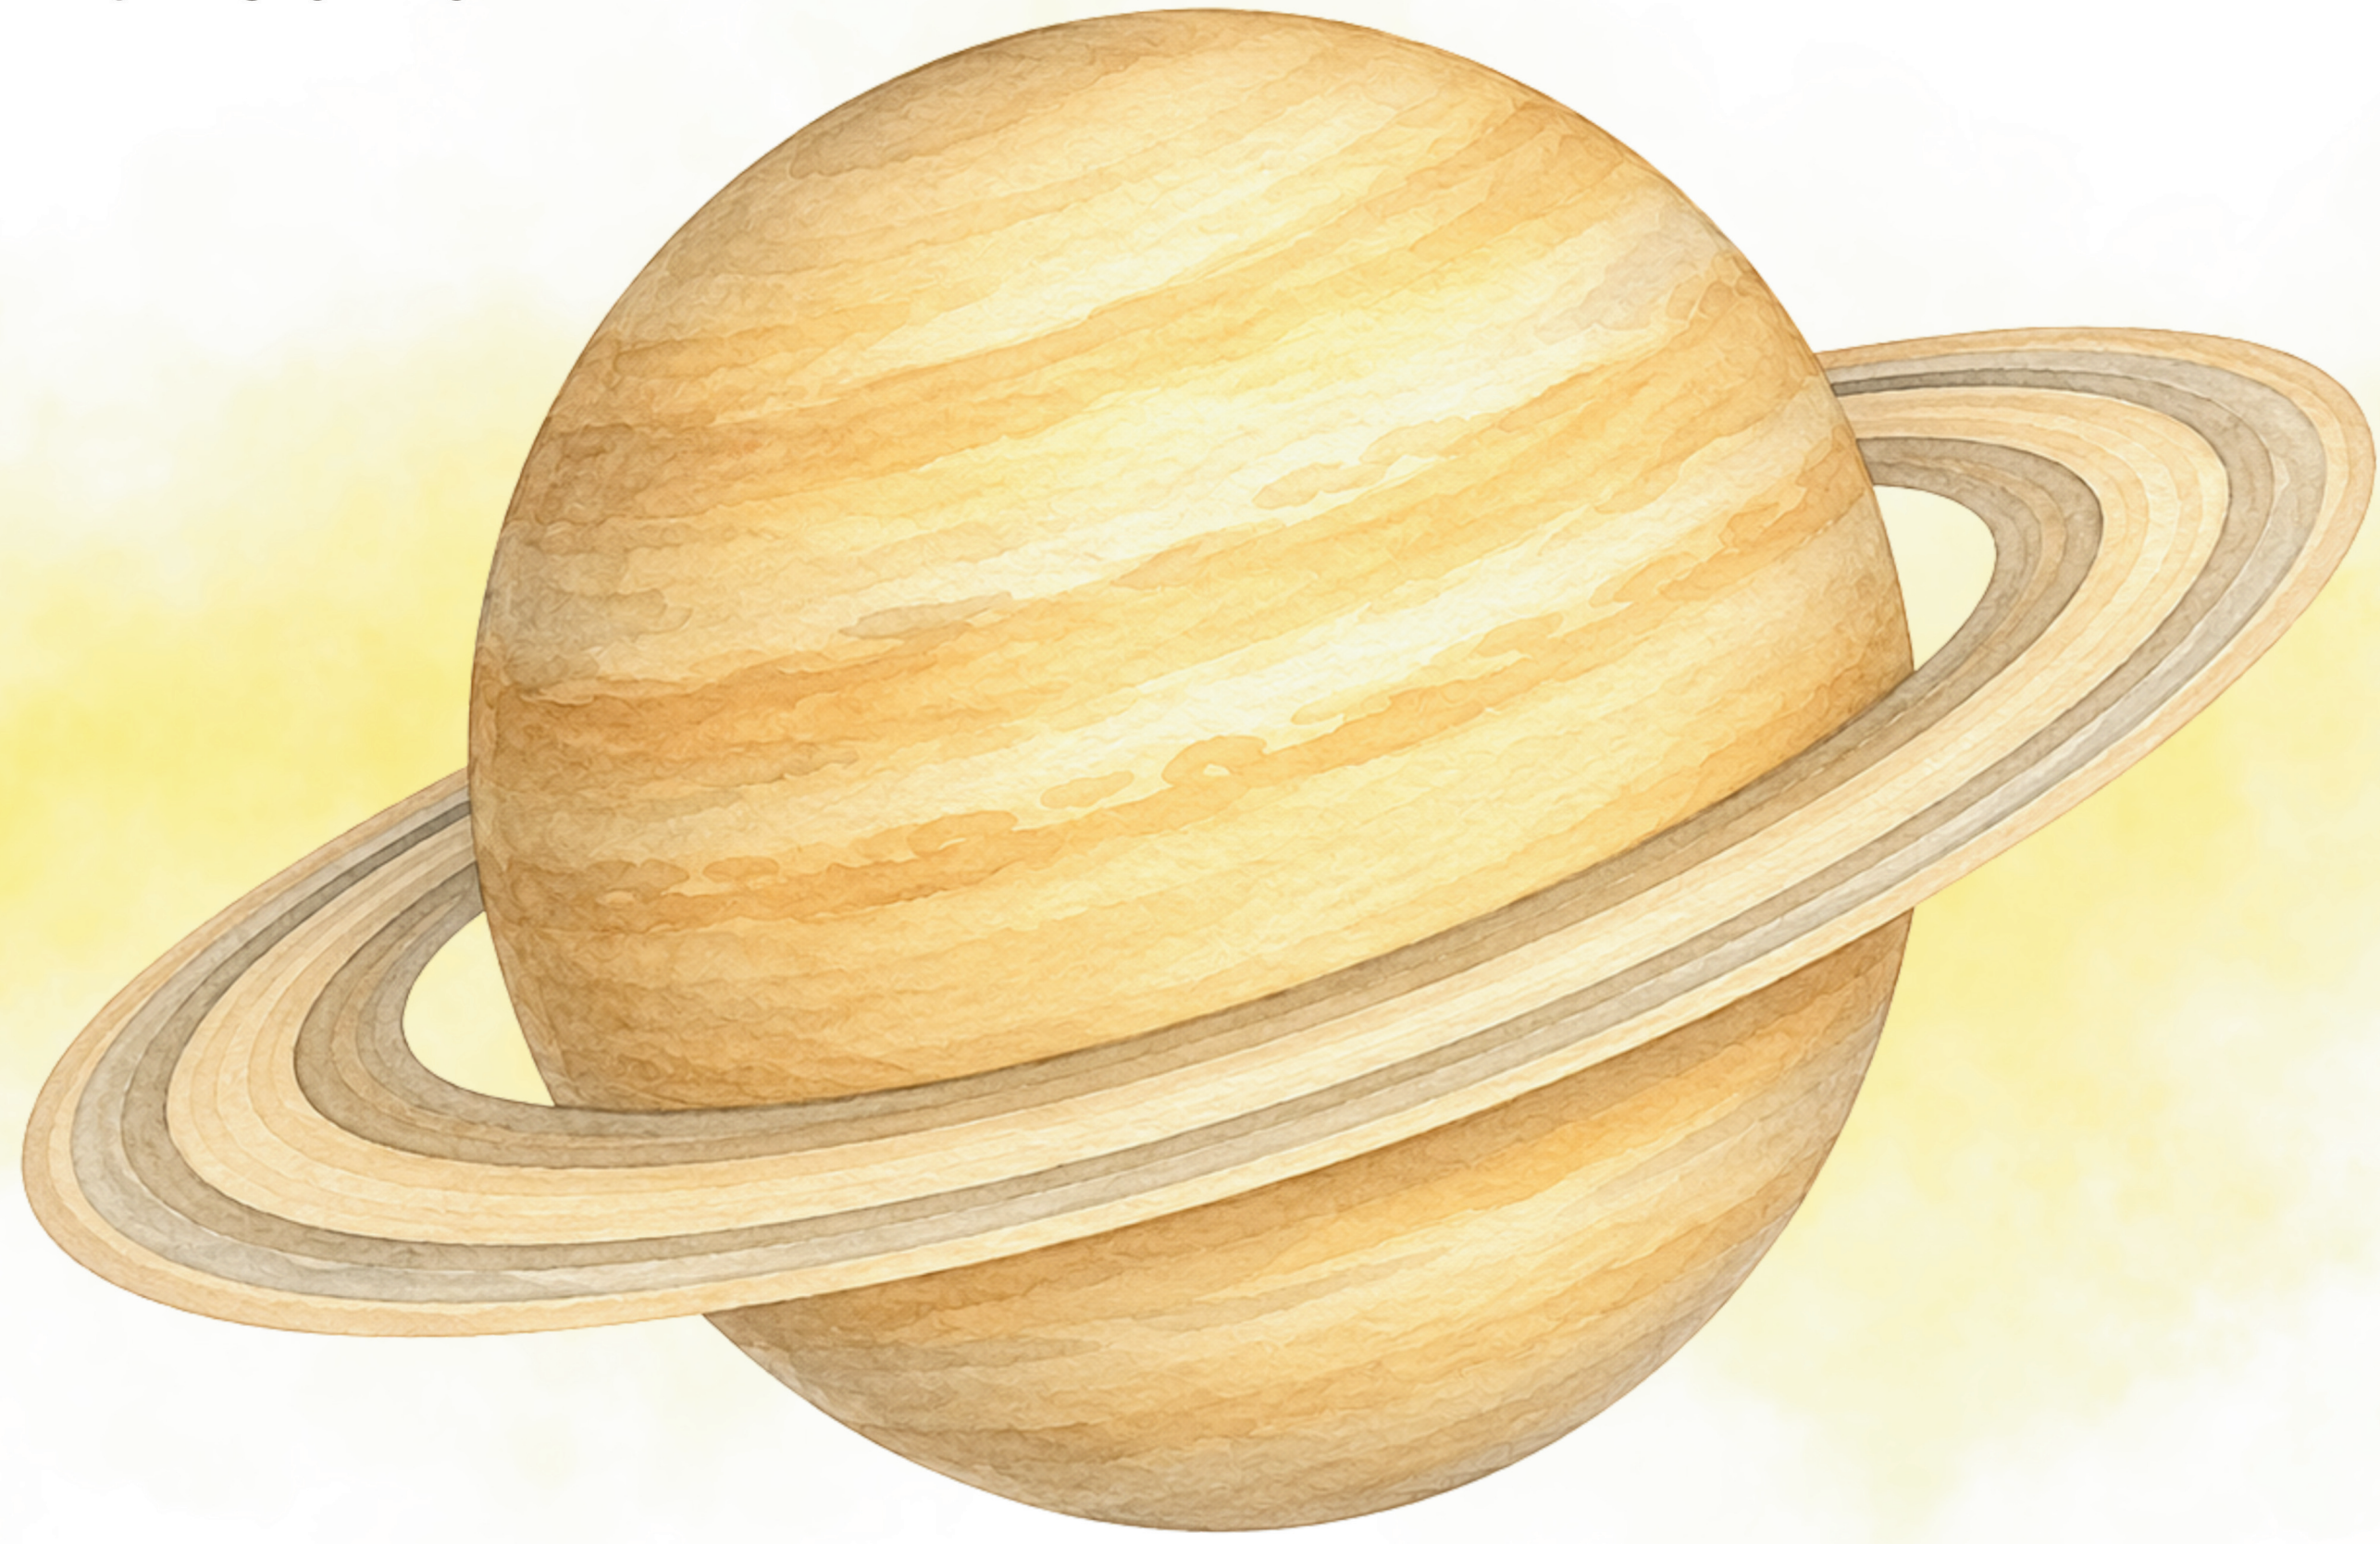

JUPITER

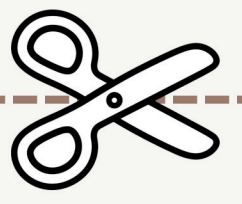

Jupiter is the biggest planet.
It has a giant storm bigger than the Earth.

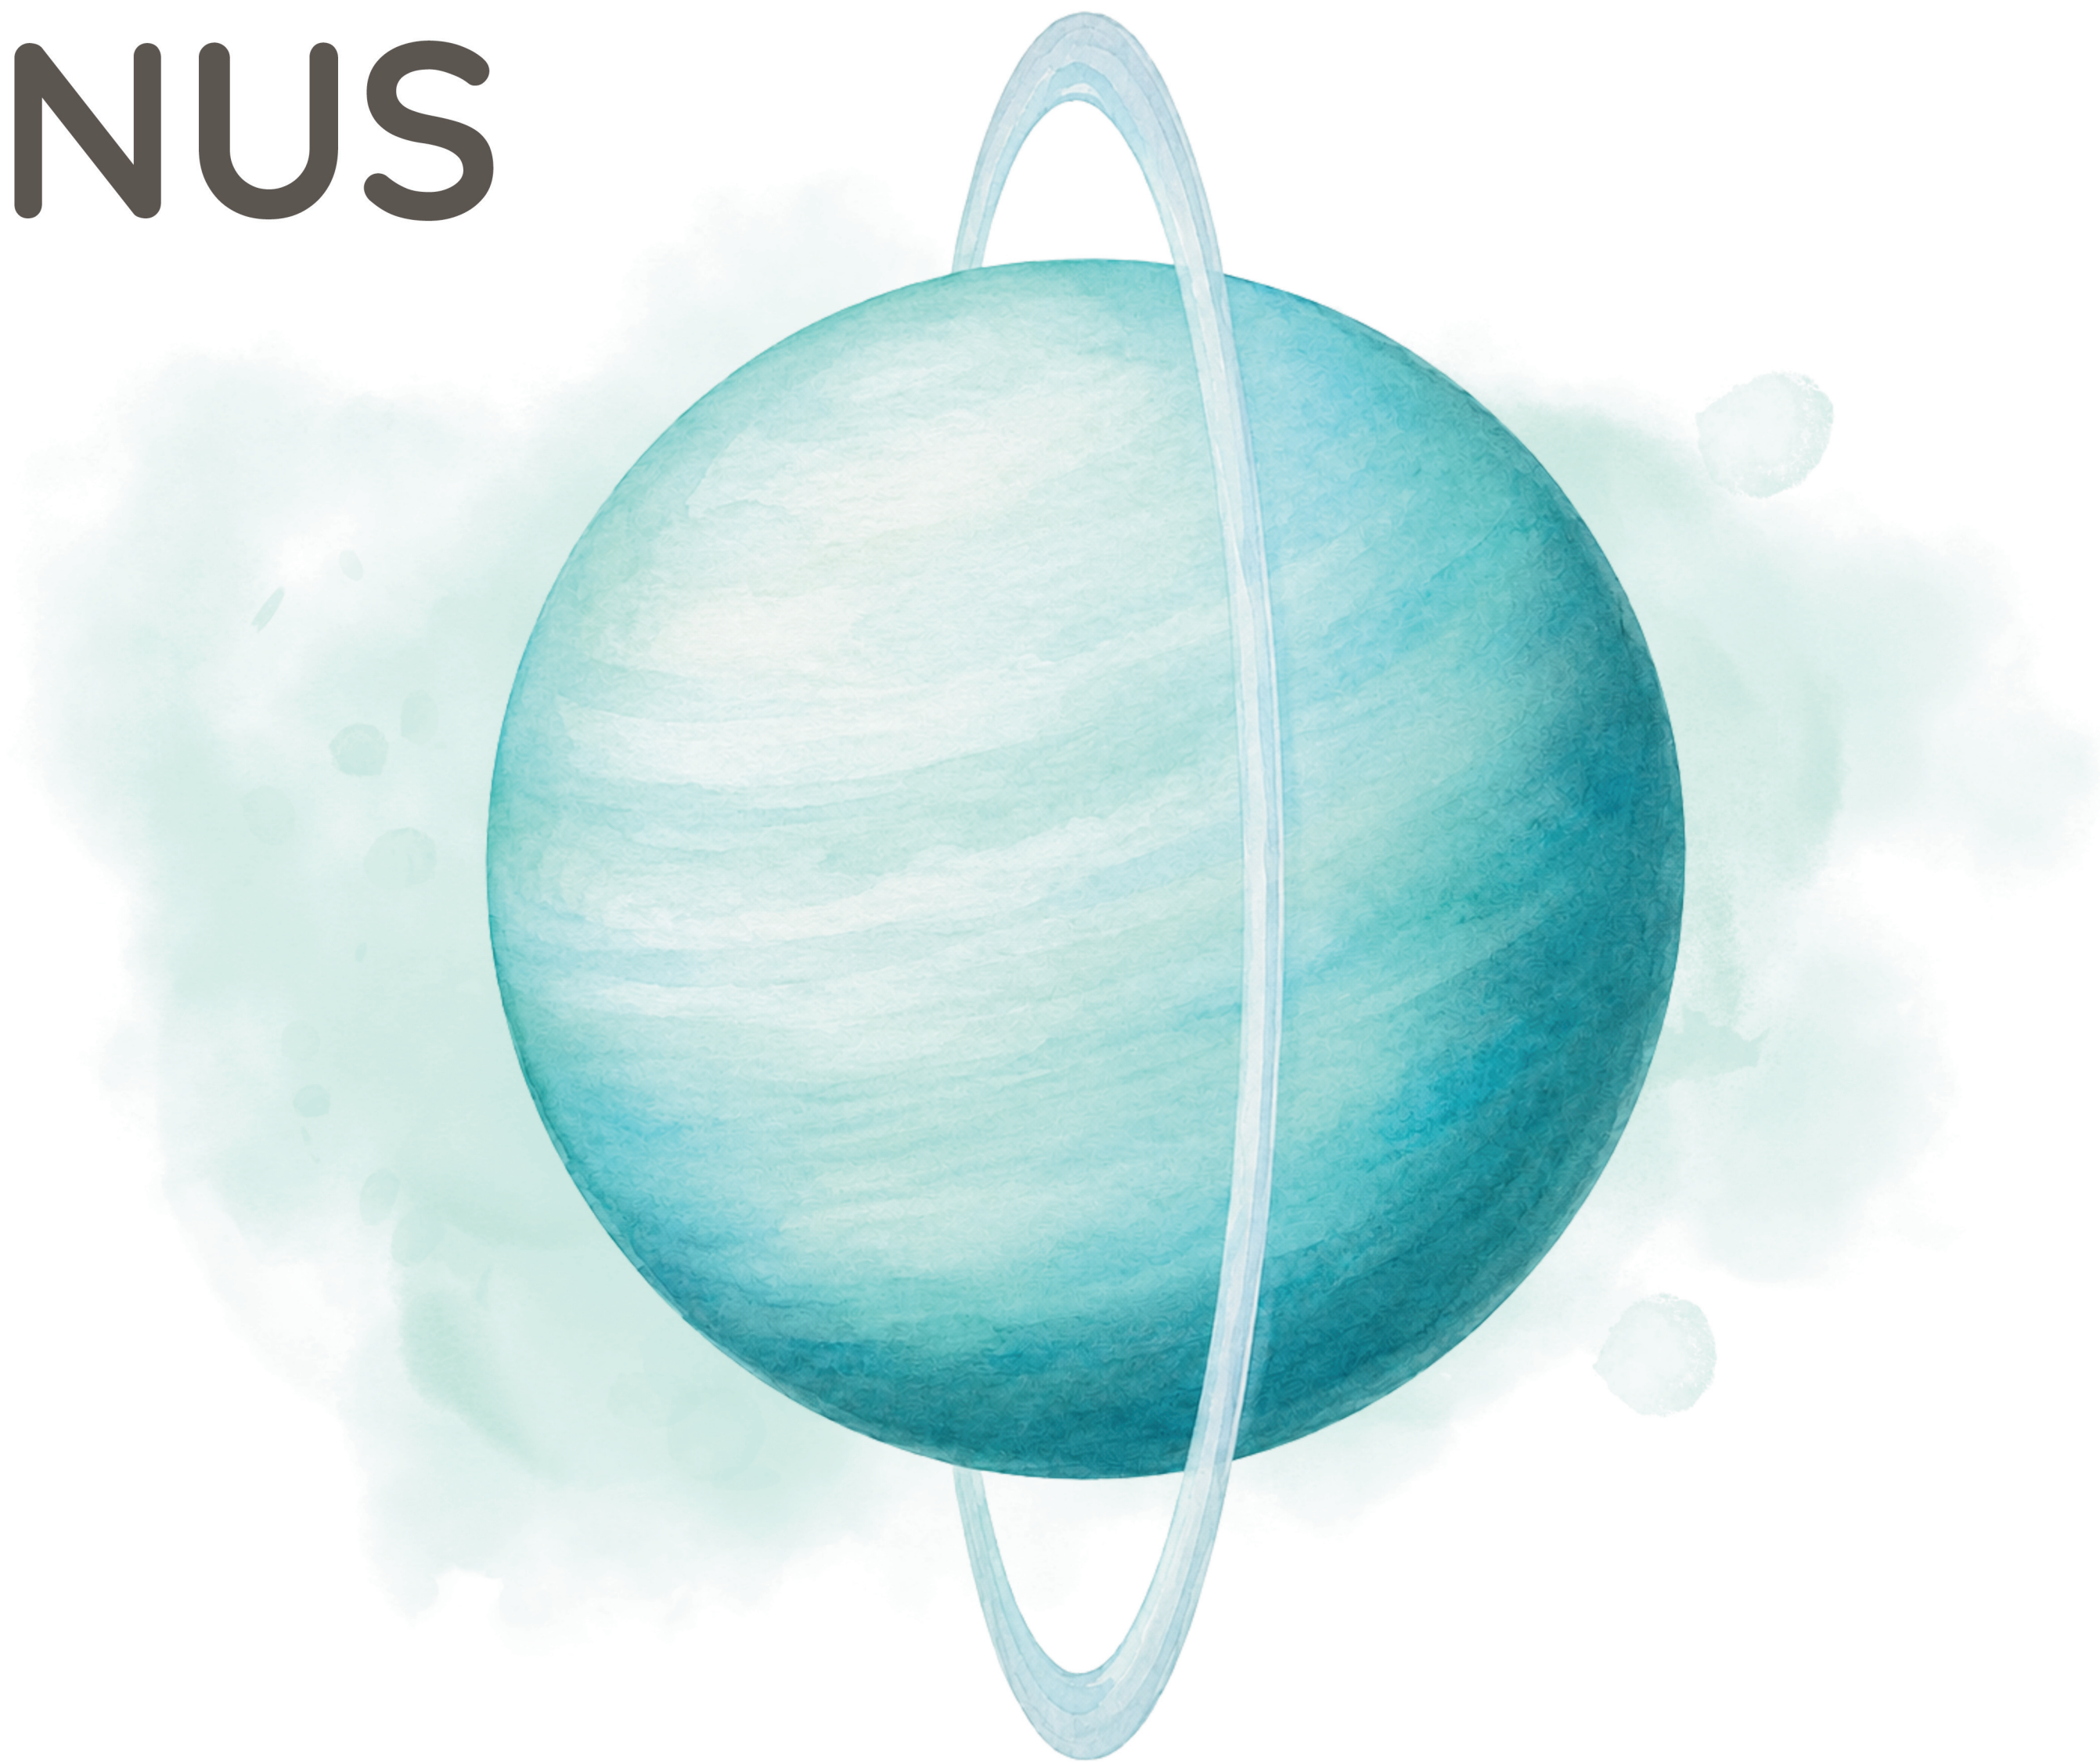

SATURN

Saturn has beautiful rings around it.
The rings are made of ice and rock.

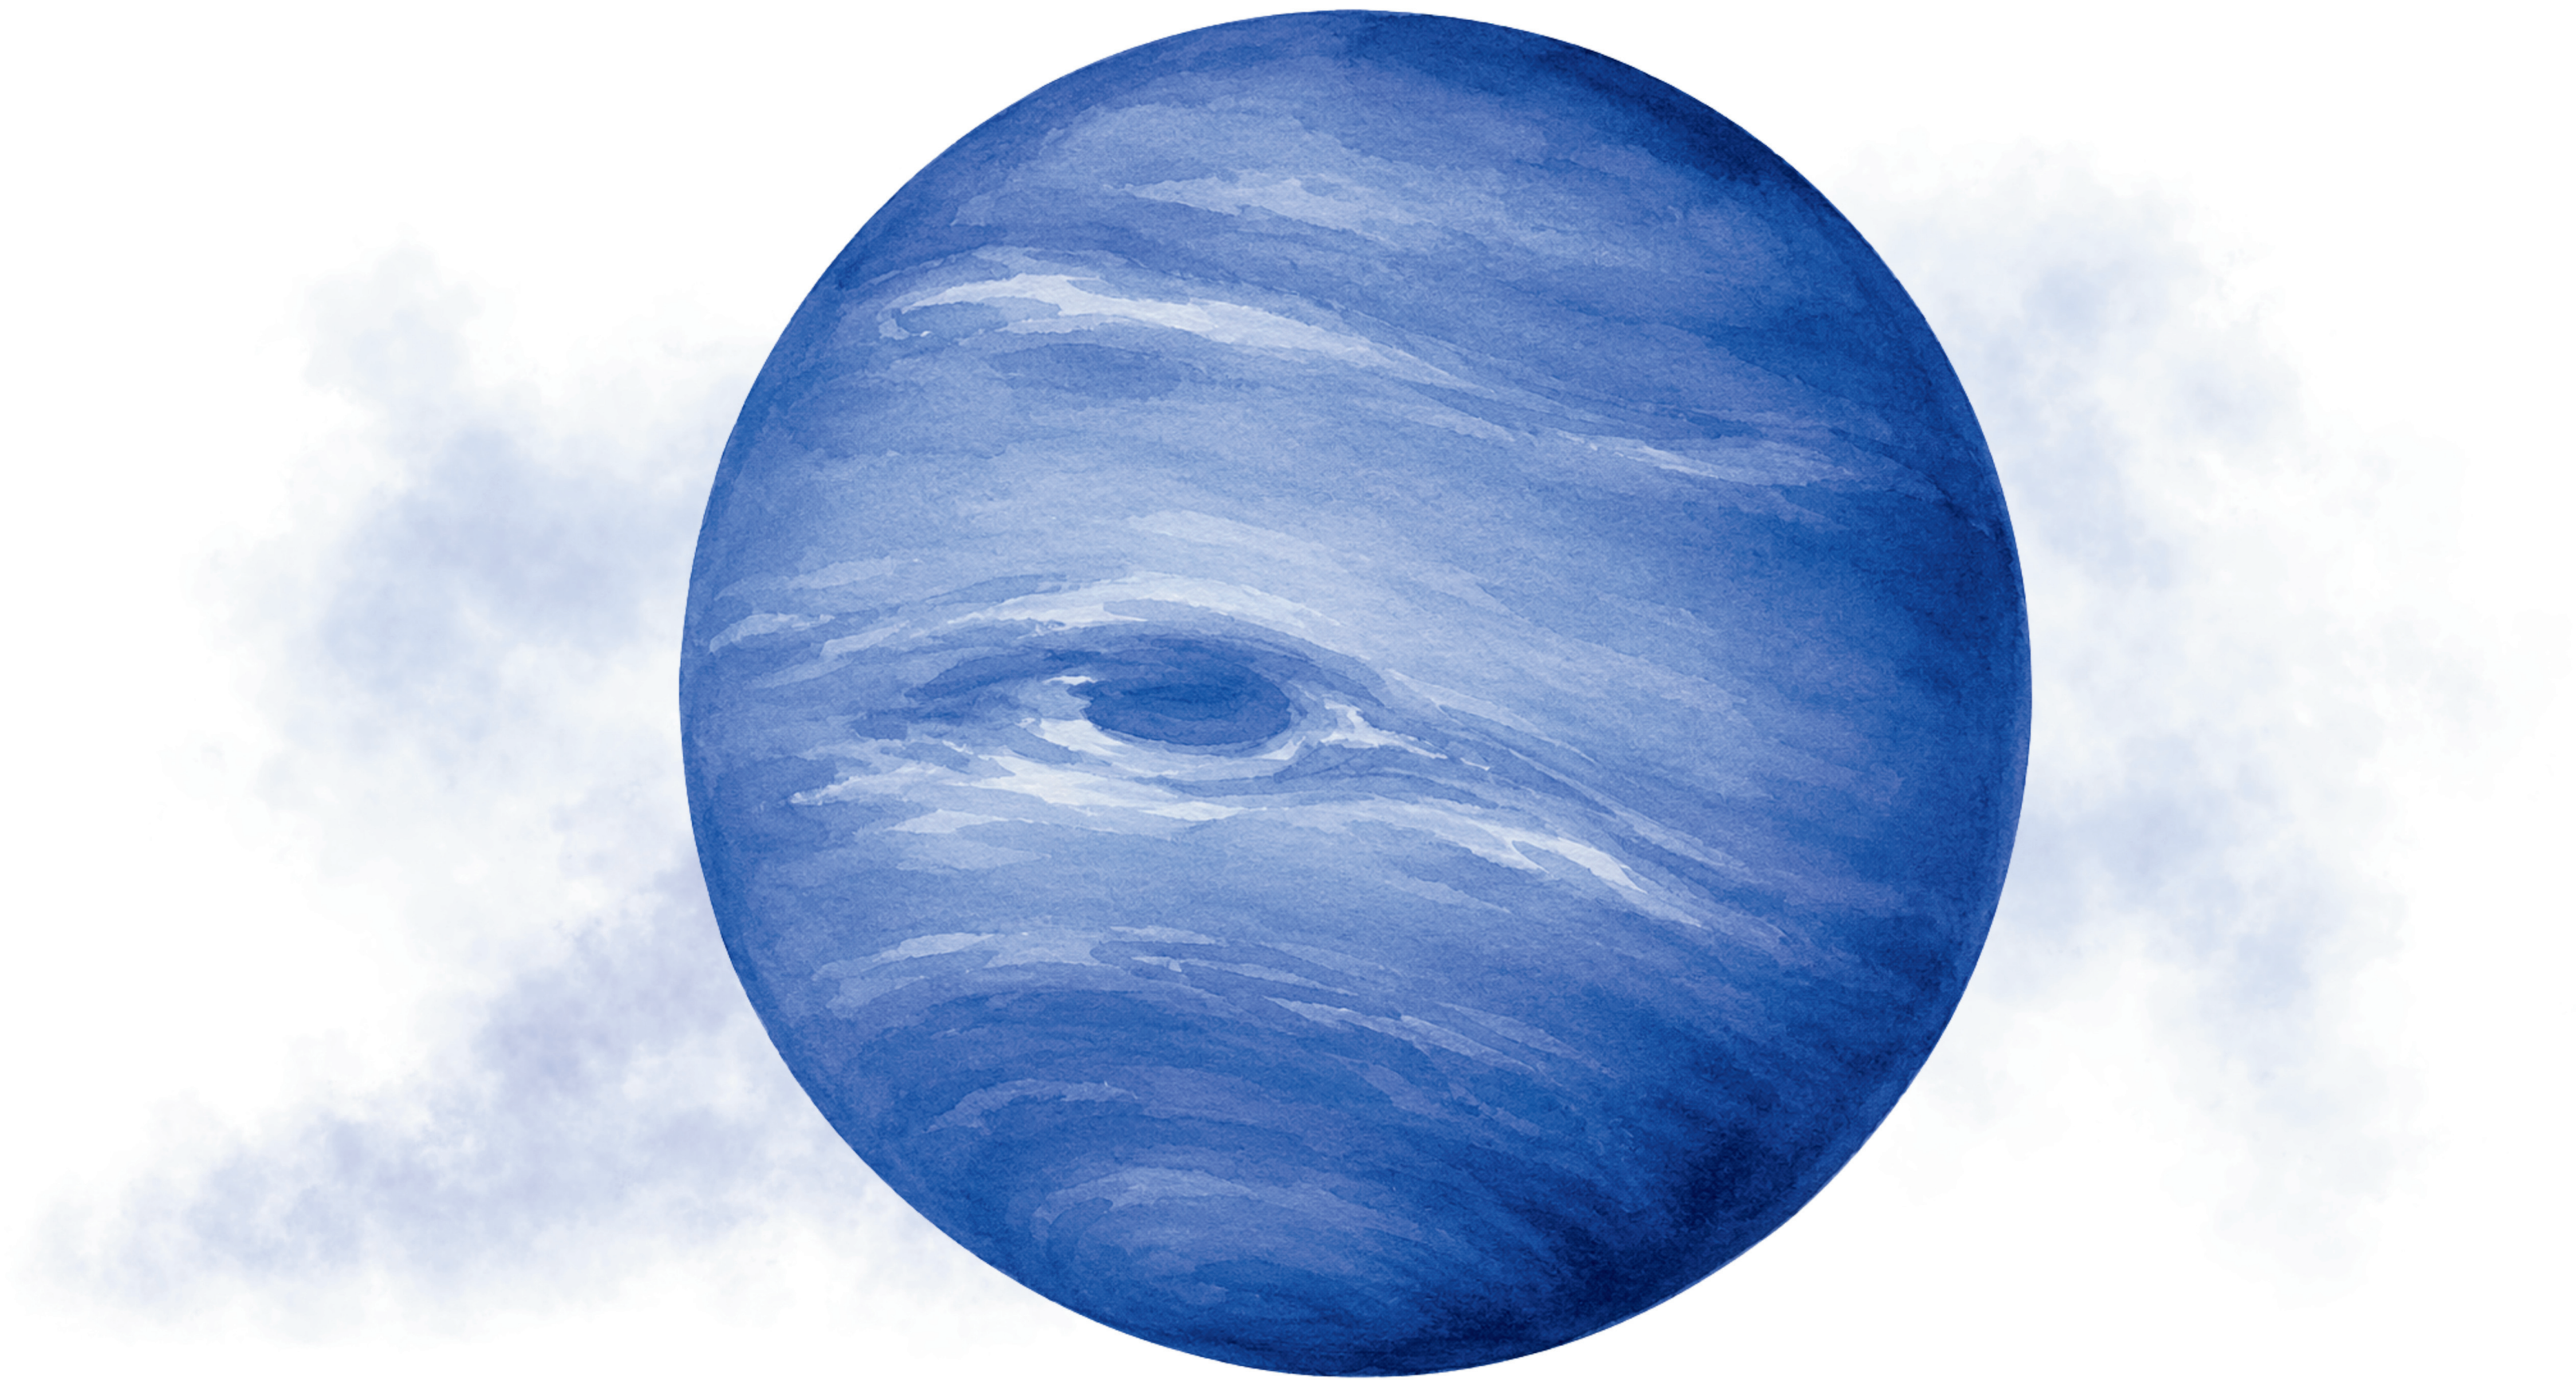

URANUS

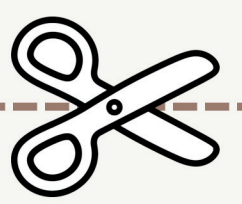

Uranus spins on its side.
It is a cold, pale blue planet.

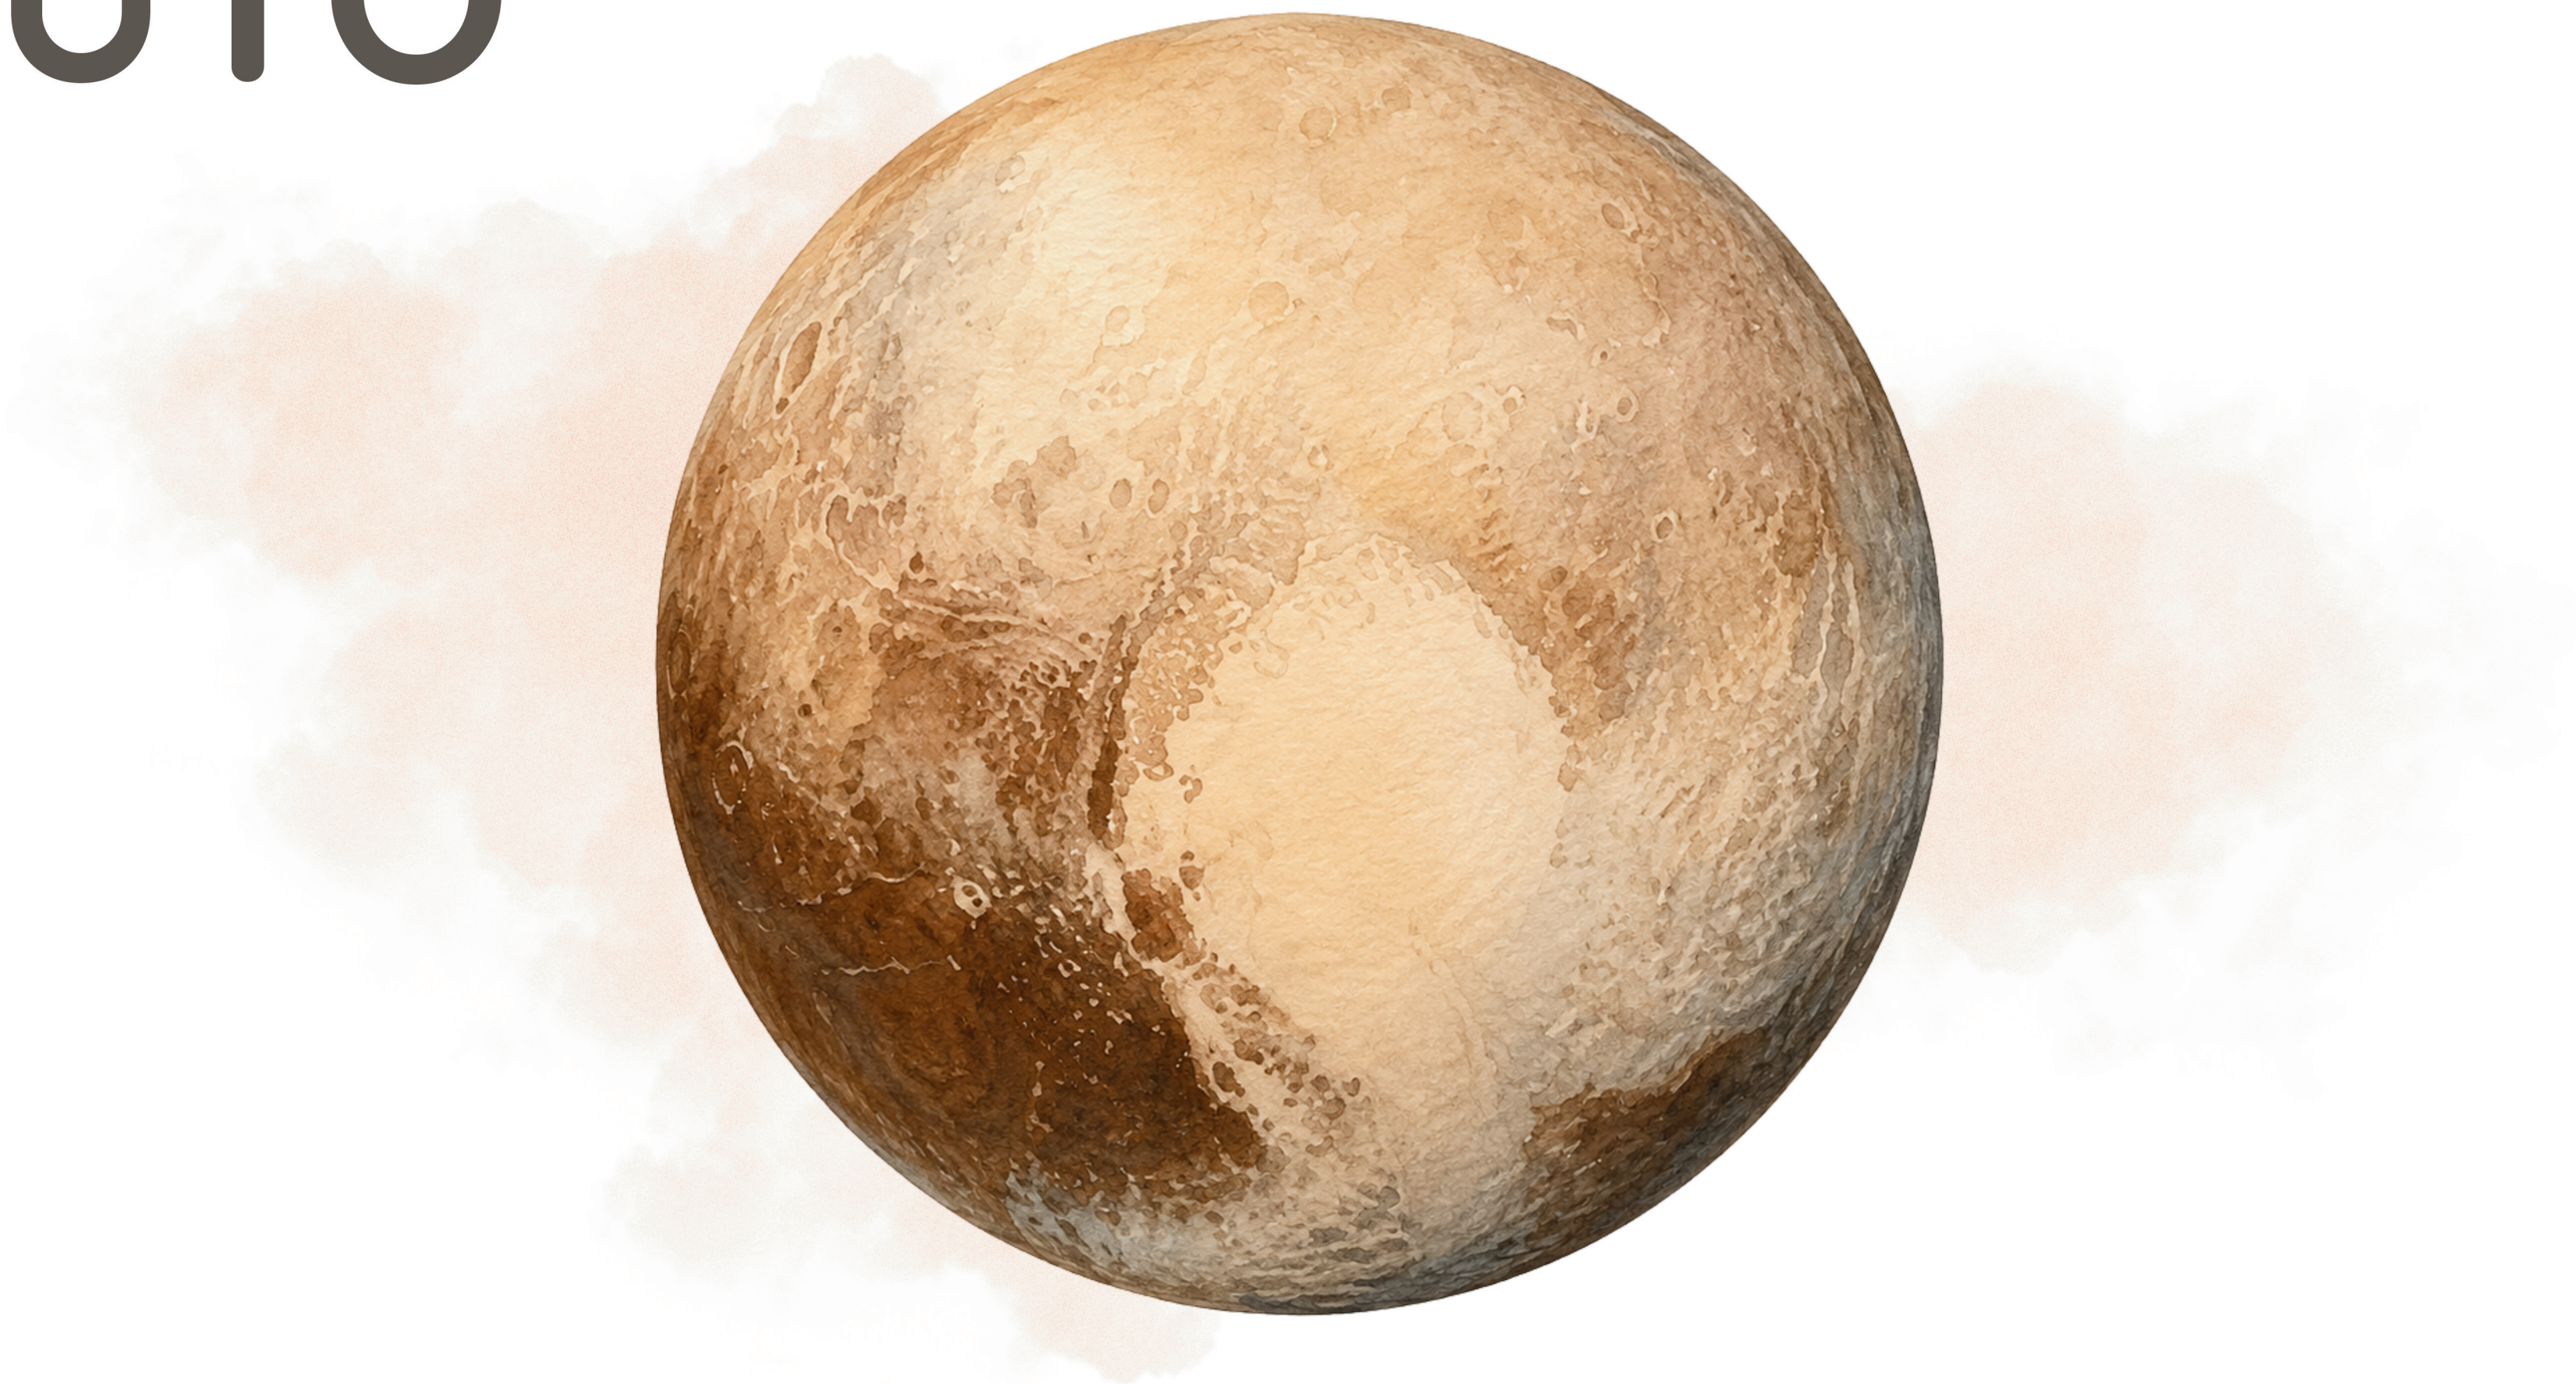

NEPTUNE

Neptune is the farthest planet from the Sun.
It is a deep blue, windy world.

PLUTO

Pluto is a dwarf planet — smaller than the eight planets.
It has a big pale patch shaped like a heart.
